

Döscher & Döscher GmbH ■

specialised for moisture and density measurement based on a microwave-system for laboratory and process

NEWSLETTER – September 2005

Döscher & Döscher with a new development at the trade fair POWTECH in Nürnberg/ Germany – the explosion proof online moisture measurement system – MoistureScan EX

The trade fair POWTECH takes place from 11.-13. October in Nürnberg. Döscher & Döscher presents in hall 7, stand 7-413 the new MoistureScan Ex.

The **MoistureScan Ex** is a special version of the MoistureScan including all the benefits, such as fast and precise measurement. The MoistureScan Ex is suitable for flush-mounting inside explosion zone 20 (dusty atmosphere). The product-lateral sensor surface may be established within zone 20 for highly combustible environments. The remaining components of the measuring instrument are suitable for zone 22. Another version is completely suitable for zone 20.

Use of product

- The process parameter moisture will be measured in explosion zones
- Your product quality will be achieved faster and rejection will be minimized
- Your production is continuously informed in a timely manner

MoistureScan Ex II

Online support via Internet

Now our customers have the possibility of online support via Internet, beside a similar modem or ISDN/DSL-card. This service is possible also under use of VPN. Which kind of remote maintenance fits for your company and your safety regulations, will naturally referred with you.

Dear prospective customer,

with this newsletter, we would like to inform you on new developments and applications of our measuring systems. Should you be interested in further information, please contact us at info@doescher.com.

If you do not wish to receive further newsletters from us, just send an e-mail with the subject "unsubscribe" to info@doescher.com
